

MASTER FITTER ASSESSMENT – DOMESTIC SHEET VINYL

OVERVIEW OF PRACTICAL ASSESSMENT

Applicant will be required to correctly apply smoothing compound to an area of approximately 4m².

Applicant will be required to install 4mm fabricated underlayment to the fitting bay.

Applicant will be required to install a fully adhered, patterned, cushion backed vinyl to a fitting bay. The fitting bay will incorporate a low level radiator, W/C and rough cut wall. The area must be treated as a “live installation”. All relevant pre-installation checks must be observed.

Applicant will be required to prepare a join in patterned, cushion backed vinyl in a separate module and apply chemical weld to join.

Applicant will be required to bring with them all tools necessary to complete the installation, (to include all PPS and safety equipment)

All materials will be provided, however, applicant may supply own materials at the discretion of the assessor.
